

外国出張報告書

平成 26 年 5 月 28 日

1. 出張国名 スペイン、フランス、タンザニア、スイス
2. 出張月 平成 26 年 5 月
3. 出張目的 GRiSP共同研究の推進とワークショップへの参加およびアフリカ稲作振興に関わる共同研究推進：B

4. 成果の概要

I visited Barcelona University, Spain, and discussed about research on mycorrhiza infection in rice root.

I participated in a GRiSP workshop discussing various aspects of research on rice roots. Each participant gave a short presentation and the workshop concluded with a session on what priorities we should set for the coming years in Montpellier, France.

At the AfricaRice station in Tanzania, I joined their scientists on a field trip to two field sites in central Tanzania where several of my new donors are grown together with African varieties to test which local varieties would be suitable recipients.

I visited the plant nutrition and root research groups at the Eidgenössische Technische Hochschule Zürich in Switzerland. I was invited to give a seminar and we discussed potential collaborations.
