

## 外国出張報告書

平成 26 年 12 月 19 日

1. 出張国名        オーストラリア
2. 出張月         平成 26 年 12 月
3. 出張目的       GRiSP New Frontierプロジェクト研究に関する打ち合わせ : B
4. 成果の概要

The main purposes of my visit to Southern Cross University (SCU) in Lismore/NSW was to meet with partners in the GRiSP project on reducing seed P.

We conducted some joint data analysis on data generated at SCU. Based on these analyses outlines for two new manuscripts were developed.

In addition we focused on completing two manuscripts based on data generated over the past 2 years at SCU and JIRCAS. Further, we discussed our GRiSP project extension proposal and developed a tentative plan for project activities in 2015 and 2016.

I also visited the agriculture research station outside Lismore and met with researchers doing work related to phosphorus uptake. It was particularly interesting to see a novel analysis method to detect soil organic P solubilization.
